

ESP International

ESP International Achieves CBAM
Compliance with CleanCarbon.ai

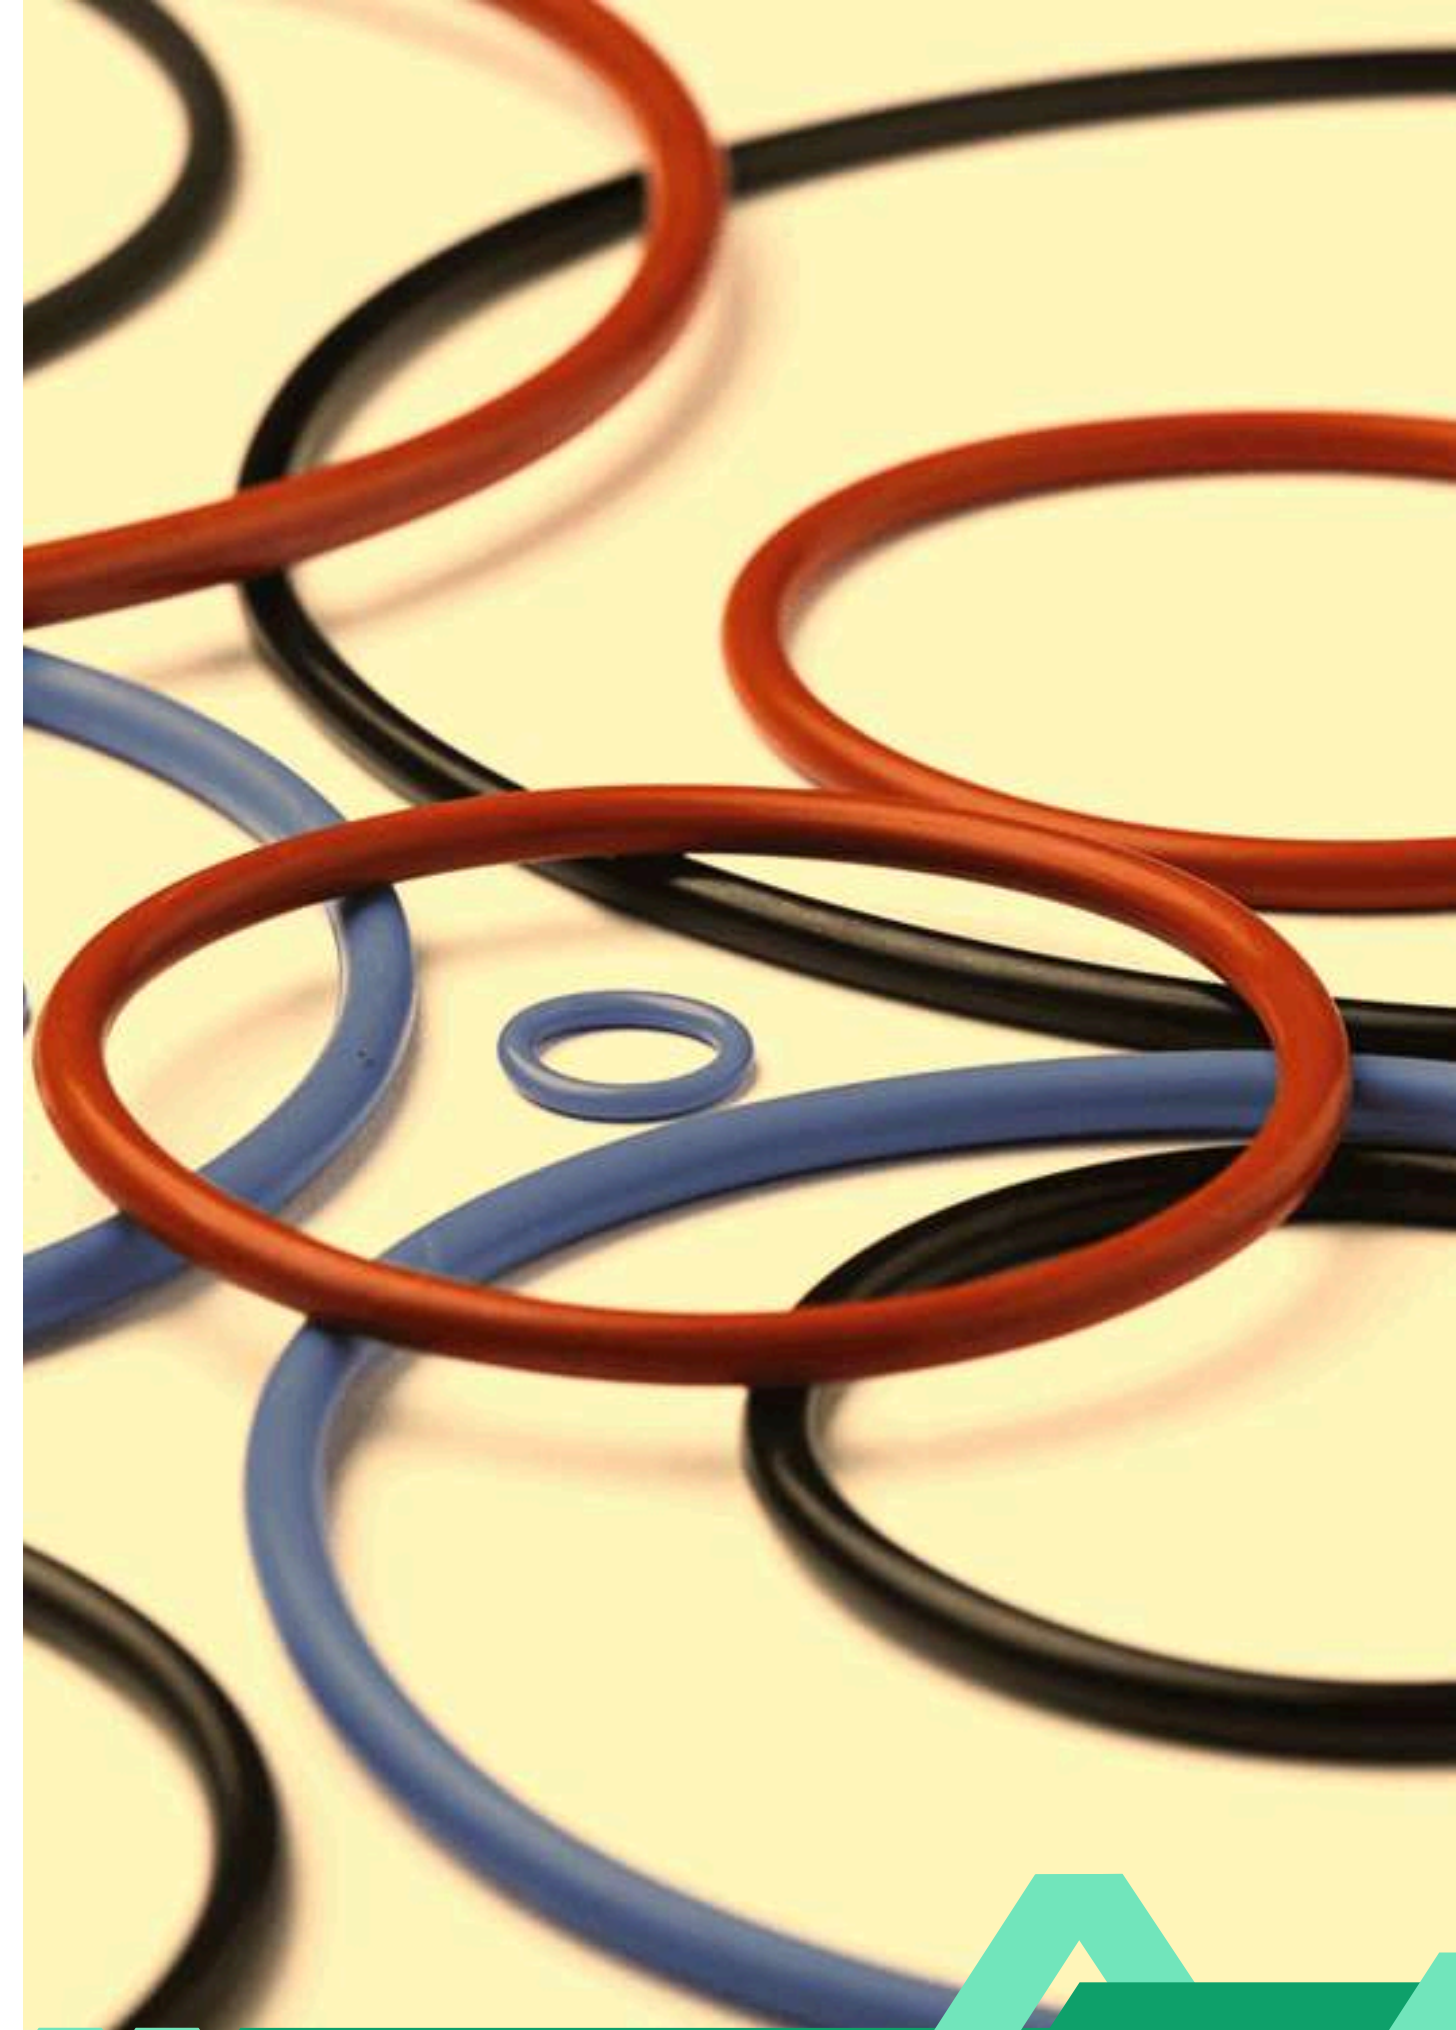

CASE STUDY

About Client

ESP International is a reputable provider of engineering solutions and products across diverse industries, including automotive, aerospace, and industrial applications. With a strong emphasis on quality and innovation, the company has consistently delivered exceptional value to its global clientele. For over 50 years, ESP International has offered a comprehensive suite of products and services that are essential to the global Original Equipment Manufacturer (OEM) market.

Business Challenges

The implementation of the EU's Carbon Border Adjustment Mechanism (CBAM) presented significant challenges for ESP International, including:

- **Complex Emission Tracking:** Managing carbon emissions across a diverse and intricate supply chain.
- **Timely Compliance:** Meeting stringent CBAM reporting requirements within tight deadlines.
- **Sustainability Targets:** Aligning compliance efforts with the company's broader environmental goals.

The Solution

ESP International partnered with CleanCarbon.ai to implement a comprehensive CBAM compliance framework. The solution included:

- **Advanced Emission Monitoring:** Tools to accurately track carbon emissions at every stage of operations.
- **Automated Reporting Systems:** Simplified the preparation and submission of CBAM-compliant reports.
- **Strategic Sustainability Planning:** Identified key areas for emission reductions and process optimizations.
- **Continuous Support:** Expert guidance to navigate evolving regulations and ensure seamless compliance.

Result

By leveraging CleanCarbon.ai's solutions, ESP International achieved:

- Full CBAM Compliance: Ensured uninterrupted access to EU markets while avoiding penalties.
- Emission Reductions: Achieved a 22% reduction in carbon emissions through optimized processes and sustainable practices.
- Operational Efficiency: Integrated compliance measures without disrupting day-to-day operations.
- Reinforced Reputation: Enhanced its standing as a responsible and environmentally conscious organization

Conclusion

CleanCarbon.ai's CBAM solutions enabled ESP International to meet regulatory requirements efficiently while advancing its sustainability objectives. This partnership demonstrates how innovative tools and strategic guidance can empower companies to navigate complex compliance landscapes and contribute to a greener future.
