Top CBAM updates

EU Parliament Approves Changes to CBAM Rules

The European Parliament approved new changes to CBAM regulations, introducing a 50-tonne exemption threshold. This move aims to ease compliance for small and medium-sized enterprises (SMEs), exempting around 90% of importers while still covering 99% of emissions from targeted goods like iron and steel, aluminium, cement, and fertilisers. (Read more: [Institute of Sustainability Studies](#))

EU and UK Agree to Link Emissions Trading Schemes

The EU and UK reached a landmark agreement to link their respective Emissions Trading Schemes (ETS). This alignment is expected to save UK exporters approximately £800 million (\$1,016 million) annually in carbon border taxes, facilitating smoother trade relations post-Brexit. (Read more: [Edie](#))

India-EU FTA Talks Address CBAM Concerns

India and the EU are actively discussing the implications of CBAM in their ongoing Free Trade Agreement (FTA) negotiations. India has expressed concerns over CBAM's potential impact on its exports, seeking clarity and adjustments to mitigate adverse effects. (Read more: [The Economic Times](#))

UK Publishes Draft CBAM Legislation

The UK government released draft primary legislation for its own CBAM, set to take effect on 1 January 2027. The legislation aims to place a carbon price on specified goods imported into the UK from sectors at risk of carbon leakage, aligning with global efforts to reduce emissions. CBAM Reporting: How It Impacts Indian Iron and Steel Sector

India's iron and steel sector—particularly MSMEs in the secondary steel segment—is under growing pressure as the EU's Carbon Border Adjustment Mechanism (CBAM) takes shape. The policy brings substantial challenges, including projected cost increases of up to 25%, limited access to reliable emissions data, and complex regulatory requirements. Together, these factors pose serious financial and compliance risks for exporters aiming to maintain their foothold in the EU market. In this blog, we dissect how CBAM deeply changes the iron and steel sector. [Read More](#)

Solving Our Customer's Challenges (Case Study)

Shalco Industries Witness 12% Emission Reduction

Shalco Industries, which is a leading manufacturer of industrial fasteners and precision components, caters to sectors such as automotive, aerospace and heavy machinery. It is a globally reputed company, with significant business presence in the EU market. However, CBAM compliance put the company and its business at risk due to reporting challenges. This is when a robust CBAM compliance strategy was implemented with tailored solutions to monitor, measure and account for embedded emissions under the CBAM. The report was submitted on time to the importers allowing Shalco Industries free access to the EU market. [Know more](#)

UNPACKING CBAM

We do only CBAM compliance so that you can focus on your business.
